SUBJECT: EMBASSY AMMAN ASSESSMENT OF FMS REQUEST FOR  
AN/MPQ-64 FI SENTINEL RADAR

¶1. (SBU) The Government of Jordan has requested authorization to purchase AN/MPQ-64 FI Sentinel Radar from Thales Raytheon Systems. Jordan is currently seeking a replacement for their outdated AN/TPS-63 radar, but needs time to finance such a large transformation. The acquisition of this radar system would supplement their current legacy system to enhance their air defense capability in the interim.

¶2. (SBU) These defense articles will not affect the existing force structure of the Jordanian Armed Forces (JAF).

¶3. (SBU) This request will enhance interoperability with partners in the Central Command (CENTCOM) Area of Responsibility (AOR) and is a key objective of CENTCOM's Theater Strategy and their Theater Security Cooperation Plan. Jordan plays an instrumental role in supporting U.S. efforts in the region and merits further U.S. assistance in this key area of national defense. Approval of this request will improve Jordan's ability to provide internal national security and significantly enhance Jordan-U.S. force interoperability when deployed overseas as coalition partners.

¶4. (SBU) The request is to purchase 5 AN/TPS-63 radars with an option to purchase more at a later date.

¶5. (SBU) CENTCOM Commander's concurrence will be provided separately.

¶6. (SBU) The Embassy does not anticipate negative reaction from Jordan's neighboring countries. This action represents only a modest increase to Jordan's current capabilities and is not a technological advancement significant enough to affect the regional balance of power. This purchase will not impact the foreign policies of Jordan or of its neighbors.

¶7. (SBU) Jordan already accounts for, safeguards, operates, and maintains similar and more sensitive items without difficulty. In October 2008, Jordan received a rating of "successful" following the Defense Security Cooperation Agency's (DSCA) Compliance Assessment Visit (CAV), DSCA's highest rating. The rating was based on End Use Monitoring (EUM) compliance with their three EEUM articles, including Advanced Medium-Range Air-to-Air Missile (AMRAAM), Javelins, and NVDs. The Country Team assesses that Jordan is a trustworthy custodian of sensitive U.S. technologies.

¶8. (SBU) Jordan will require classified briefings, operator and other technical training from U.S. trainers. The Country Team does not anticipate any negative reaction from neighboring countries regarding this technical training.

¶9. (SBU) The Country Team does not anticipate any negative impact of in-country U.S. presence required to provide these articles.

¶10. (SBU) Jordan is purchasing these AN/MPQ-64 FI Sentinel Radars with Foreign Military Financing (FMF).

¶11. (SBU) There are no human rights considerations relevant to the proposed acquisition.

¶12. (SBU) The Military Assistance Program (MAP) in Jordan currently has an effective End-Use Monitoring (EUM) system in place for the JAF. These items will require periodic inspection and inventories which will be completed as a part of the MAP EUM program.

¶13. (SBU) Embassy Amman recommends approval for the transfer of the AN/MPQ-64 FI Sentinel Radars. The recommendation is based on the Country Team's assessment that the acquisition will improve Jordan's border security, internal defense, and counter-terrorism capabilities, while representing no political or technological risk to the U.S.

¶14. (U) POC for this action is MAJ Jason E. Figueiredo (USA) at 011-962-6-590-6711 or jfigueir@san.osd.mil.
